

Grid RPG Foundation Build 001

This is the first clean-rebuild foundation. It proves that a browser project can render a grid, move a player, reject invalid movement, inspect state, and run developer tests.

Files

- `index.html` - Page structure and controls.
- `styles.css` - Visual styling.
- `game.js` - Grid rules, player state, rendering, input, developer console, and tests.

Run it

1. Create a new empty folder.
2. Put all four files in the same folder.
3. Open the folder in VS Code.
4. Open `index.html` with the Live Server extension.
5. Click the grid once so it has keyboard focus.
6. Use W/A/S/D or the arrow keys.

Required tests

Test 1: Initial state

Expected:

- A 12 by 9 grid appears.
- The blue player starts at coordinate 1,1.
- The console reports that foundation tests passed.

Test 2: Normal movement

Move right once.

Expected:

- The player moves from 1,1 to 2,1.
- Successful moves increases to 1.

Test 3: Blocked movement

From 2,1, move right once.

Expected:

- The player does not move into 3,1.
- The status changes to Blocked.
- Moves attempted increases, but successful moves does not increase.

Test 4: Developer console

Run these commands one at a time:

```
state
teleport 8 5
state
teleport 3 1
reset
```

Expected:

- `state` displays the player state.
- `teleport 8 5` works because that cell is open.
- `teleport 3 1` is rejected because that cell is blocked.
- `reset` returns the player to 1,1 and clears movement counters.

Test 5: Automated checks

Run:

```
tests
```

Expected:

- Five out of five tests pass.

What this build does not contain

This build intentionally does not contain skills, items, recipes, biomes, saving, combat, or multiplayer. Adding those before the movement and state foundation is verified would make later debugging harder.

Next gate

After this build passes, the next step is to separate the game state and rules into dedicated modules, then add one resource node and one gather command. The resource will be used to prove that new content can be added without rewriting movement.
